Olympus uhi-4 insufflator service manual

Follow us on Facebook! Click here to visit our new Facebook page. first 5 mm in autoclave HDTV videoscope deformable in the world. Advanced technology chip-on-the-tip ensures sharp, bright images in a 5 mm diameter. Fog Free Function ENDOEYEs 10mm have a free mist function that will reduce the amount of time for the goal to defog from minutes to seconds. By heating the distal tip of the laparoscope before or during surgery, fogging is reduced, allowing a clear field of vision. A temperature sensor controls the heat of the distal tip that prevents fogging of the absolute ENDOEYE throughout the procedure. Focus fire free advanced optical design provides greater depth of field, eliminating the need for manual focusing. NBI (Narrow Band Imaging) NBI is a proprietary optical enhancement technology that is only available on OLYMPUS products. NBI improves the visualization of the vessels and other tissues on the surface of the mucosa and is 20% brighter than previous models. saving autoclavability OLYMPUS All surgical areas are autoclavable, including the new 5 mm / 10 mm ENDOEYE FLEX. After the procedure, no one else has any need to order the right purposes put in the autoclave tray and sterilize. Simplified configuration The integrated all-in-one design and ENDOEYE ENDOEYE FLEX allows easy configuration. The Surgical Imaging platform serves as a hub to connect the rigid and flexible areas through multiple specialty training, for standardization, reprocessing and the service to reach or efficiency. It also connects with a series of digital devices and networks to provide images, video management and documentation. The unit insufflation UHI-4 has a high maximum flow rate and the advanced functionality. It improves performance and reliability in surgical-laparoscopic environments. High speed blowing up to 45 l / min.Automatic smoke evacuationInsufflation different sized cavities us for information, assistance, support, or to request a demo. All our pre-owned equipment is provided with a 90 day warranty and will be repaired / checked before delivery. Product Description The Olympus UHI-3 Insufflator is in excellent condition and certified for proper operation specifications.The UHI-3 High flow insufflation unit has an integrated flue gas system. It offers the abdominal optimal conditions that allow a more targeted surgery. The large front panel display allows you to check critical data at a glance. clear interior space for tests of clear-thinking. When the UHI-3 is connected to the pedal fumes evacuation, removal fog begins with depression of the pedal. Just press the footswitch (optional), and smoke and fog will be evacuated in order to keep your clear vision during surgery. Best and most ergonomic view of reducing stress in the operating room and improve the quality, safety and speed of each procedure. Insufflator Olympus UHI-3 Features: Powerful 35 L / min insufflation: The UHI-3 has a high capacity powerful feed gas. E 'able to respond quickly to gas leaks to return to the predetermined pressure level. Automatic Relief: When the abdominal pressure becomes too high, a warning light and an alarm are activated, and a pinch valve on the suction pipe opens automatically to download the excess pressure. Low Noise Design: noise is particularly low maintained through an innovative mechanism in the electromagnetic valve. Capacity You can set up quickly programmed to low, medium or high mode: 3 main stream settings. Check blow to critical data The actual and preset pressures are displayed simultaneously. You can easily monitor the necessary information, while remaining concentrated on what is being done. Connectable to Medical Gas Pipeline: The UHI-3 single pressure control mechanism allows you to connect medical gas distribution to your hospital. eliminating the need to manage heavy, uncomfortable gas cylinders. Olympus Uhi-3 Insufflator Specifications: Flow setting of the frequency: When the power is turned on, the low mode is selected. Low mode: 0.1 to 1.0 l / min. MODE MODE: 1.1 A A L / min. High mode: 20 to 35 l / min. Power requirements: Voltage (AC): 100 to 240 V. Frequency: 50/60 Hz. Input: 150 goes. Voltage fluctuation: from Å. Å ± 10%. Dimensions: Dimensions 295 mm (L) x 340 mm (P) x 150 mm (h) (housing dimensions). Weight: 10 kg. PDF A PSS We are proud of our customer service and I am happy to offer all the help you need regardless of the size of the query. We have an Ethos to provide the best quality products at affordable and fully supporting them with our team of highly qualified and experienced technicians and engineers. Our promise price: we propose to offer the most competitive price, but if you can buy the same article elsewhere for a better price let us know and try to match the price or better. Demos / Loans: Picking Equipment from a website can be quite a challenge. We can visit your practice, so you can taste our products and discuss your needs with one of our teams. How to order: You Donate T have to pay now. Many of our customers have opened with us as they like to be billed later, instead of paying now. You can order: Online: you can order online and select the billing option more for you to suit mail: tel: 01452 347.101 you are reading a free preview pages from 7 to 12 are not shown in this preview.
