## How do you abbreviate continued

Handy as they might be, abbreviations can sometimes lead to problems. There might be more than one way to abbreviate a certain word, for example. There also might even be a wrong way to do it. With continued, both of these issues are present. The most commonly recommended abbreviation for “continued” is cont. Cont’d is also a correct way to make “continued” shorter. It’s a contraction, rather than an abbreviation. When writing continued on next page you should consider spelling out the full phrase instead of using a shortened form. Here’s a tip: Want to make sure your writing always looks great? Grammarily can save you from misspellings, grammatical and punctuation mistakes, and other writing issues on all your favorite websites. Cont. vs. Cont’d Most style guides, including The Chicago Manual of Style, advise that if you have to abbreviate the word continue, you should write “cont” and add a period after it. Using cont. as the abbreviation for continued will not get you in trouble in general use, and it probably won’t get you in trouble in academic or professional use. That being said, if you have to adhere to a specific style guide when you’re writing, it would be a good idea to check it for instructions. Cont’d is another way of making continued shorter. Even though it might not be mentioned in style guides, it’s not incorrect. Take a look at the word “can’t.” Its full form is “cannot,” but if you take out some of the letters from the middle and add an apostrophe where they should be, you get a grammatically correct contraction. With cont’d, you’re taking out the “inue” from “continued” and replacing it with an apostrophe. What you get isn’t an abbreviation, but it is a contraction. Con’t, on the other hand, mixes the rules of abbreviations and contractions. It lacks more than half of the letters of the original word, and it has an apostrophe in an inappropriate place. You should avoid using it. How to Write “Continued on Next Page” In some cases, you might want to point out that something continues on the next page. In most situations you don’t have to do it—people know how to read something that’s written over multiple pages, and page numbers are usually all you need to keep a document in order. However, if you’re creating a table, for example, that spans multiple pages, you might want to point out that it continues on another page. In journalism, stories sometimes start on one page of a newspaper and continue on another non-adjacent page. In both cases, writing “continued on next page,” or “continued on page X” is the best way to ensure that the person reading understands where to find the rest of the text. You might have seen a few different abbreviations for “continued,” including cont., cont’d., and even con’t. But not all of them are correct. In fact, some of them are not even abbreviations. So, why do so many people get confused when it comes to this abbreviation? And, which of them should you use? “Continued” abbreviation — the confusionSome words like “sir” and “missis” have set abbreviations which are “sr.” and “Mrs.”, respectively. So, to which group of words does “continued” belong? The answer is, in both. Legal paperwork, medical journals, and military reports may all use cont. to indicate that more pages follow. The Chicago Manual of Style recommends this variation of the abbreviation for business writing. This contracted abbreviation of the word is very popular in informal text. It combines the omission of letters and the inclusion of an apostrophe. An example that best illustrates the uses of this version of the abbreviation is a screenplay. In screenplays, you’ll often see cont’d used to show that the same character is speaking after a pause. In this context, the abbreviation cont’d helps the actor to understand that his character continues speaking after the pause. Screenwriters who use screenwriting software find that the software automatically inserts the abbreviation where appropriate. When a scene extends across multiple pages, a playwright or screenwriter often places the abbreviation CONT’D (in upper or lower case) at the top of the page next to the scene number. This is important because it eliminates the chance of confusion for the cast and crew. Other instances where one may encounter the abbreviation cont’d is in a newspaper or magazine when a story doesn’t end on the original page. In this case, the publication may indicate the page number on which the reader can read the conclusion. You’d see something like, “cont’d on page 2,” to direct you to the rest of the article. Rules to Remember When using cont., don’t forget the period at the end!
