Please try again later.They are the best. Chilton manuals are absolutely horrible, awful messes most of them full of wrong information. They are useful only as a reference, nothing more. The haynes manuals are the best you can find, even so, they do have mistakes in them from time to time but not huge ones. This is completely WRONG you will pretty much always need a puller tool for that. Other then that they are usually 99% accurate. They are all based on a complete teardown of the car by someone doing the work, not by someone sitting at a computer. So thats why they are the best.It is poorly organized, completely generalized, and practically useless. The pictures are very poor quality and often dont even show what you are trying to find out about. I tried to use this manual to do a partial rebuilt of my Blazer and finally had to go to Advance and get a manual I could make some sense of. My granddaughter could have done a better manual and pictures with her crayons. Unless you already know everything you need to know to make a repair, dont use this manual!!No match for the factory manual, but no where near as expensive. I still recommend the manual, especially for general maintenance and tune upsHoping I can send it back.I was disappointed in the quality, but considering the age of the book, I suppose thats to be expected.Boo, Hoo, so i need a new engine, and this book will help me re build itAls allgemeiner und basic Guide ist die Anleitung trotzdem sehr hilfreich.Sorry, we failed to record your vote. Since I am planning on keeping my automobile for the rest of my life, since I am 62, I dont want to be without a Chilton General Motors repair manual. Now I will not buy another Haynes book. The last four were made slightly tongue in cheek, but have proved very popular. We've got you covered with the buzziest new releases of the day. But chances are you've never stopped to think about it. Here are 7 cool things about GMC truck history that you probably don't know. The popular truck turned status symbol is beating most luxury competitors. On August 1, 1909, the future giant's Rapid F406 B was the first truck to climb Pike's Peak in Colorado. No matter if it's today's bestselling trimmed out cash cow or the "the Jimmy" of yore. And, they come by it in the most honest of ways. The delivery drivers made the trek from Seattle to New York in five days. The amphibious DUKW353 swam and drove across more than a few continents during WWII. Complete with bilge pumps, rudder, and outboard engine, GMC made them for the U.S. and allies. GMC won awards from the military for this design perfection. And, they are still around today! And, GMC gave America a dandy. The first on the market was the TVS4, or travel vehicle streamlined. The team was also behind GMC's history of its bus makes. And, the interior was replete with avocado green shag carpet. Though they were in production for a short time, they hold a great place in our hearts. His fond memory of touring days is the reasoning. GMC even came out with the "Sprint" in the 70's which is quite like Chevy's then popular El Camino. GMC began diverging from their competitor's designs in the 90's. Today, their trendy designs like the Yukon and Denali series makes converts. Each year it seems, the celebrity GMC SUV has another milestone in sales. It seems the luxe black edition with a 10 speed transmission is perfect for the desert. The language may be different there, but this region's buyers refer to GMC models as "Jims". The serious team took on the addition of a turbocharged V6 with a higher torque than the Corvette. And, the cool ashell van the mercenaries drove as a base camp.

And, the heavy duty machine took enough turns, dives, and gunshots to make it the true hero of the series. So much so that when the reboot A Team movie came out in 2010, the van got a contract, too. For example, the first electric car began a short drive before the Model T was gracing roadways. But, they did not gain enough interest for good reason. Bicycles of the era were faster. Whether you are buying new, fixing the old, or need good advice, we've got your back. Or, need a manual for your wheels. We've got those, too. And when it comes to towing strength, American And when it comes to towing strength, American pickup trucks surpass the rest. They want to claim the crown for the number one truck. Now in the top spot, after being second place for years, the 2017 Ford F450 Super Duty deserves some respect. With 32,500 pounds of towing power, this powerhouse doesn't mess around. It's the winner to date. Then there's 925 poundfeet of torque. Booyah! It's the highest capacity truck in a pickup. This monster comes in a variety of body styles, including crew cab models for drivers who want to transport more than three riders at once, the mega and regular. With 31,210 pounds of towing capacity, it's the second best pickup truck for towing on the market. The 2016 Ford F450 Super Duty model pickup is a more than able tow rig in a pickup that's meeting the qualifications of a commercial truck. It beats the RAM in horsepower with 55 more units. This makes

this model easier to make it up a steep climb when it's hitched to a trailer that's fully loaded. The GMC 3500 HD makes it easy to tow big loads with 23,300 pounds of towing capacity. It also offers additional straight line security and support. Its believed to tow up to 23,300 pounds of weight with a 5th wheel trailer hitch. It's a hauling machine. But now it's accessible and popular with consumer drivers looking for kick butt towing capacity. The truck puts out 397 horsepower and 765 lbft of torque.

It's available to properly outfitted Chevy Silverado models as well as a large number of various pickup truck configurations. The 2018 Ford F150 with hauling capacities of 13,200 makes a serious hauling statement. With gas mileage stats of 19 mpg city and 25 mpg highway, this truck not only outperforms many others, but it's also economical. Featuring comfortable seating, a luxurious cabin, it's a pleasant and comfortable ride in a refined style. This model features a 305 horsepower V6 engine and can tow hauls up to 12,750 pounds.
