Brandon 5.0 out of 5 stars This is my very first gaming like monitor to have in my room. I have a photo that is attached to this review so hopefully you guys can take a look and meet your expectations. This is a pretty wide screen for gaming you guys. I got Far Cry 5 from GameFly on the same day when the monitor came in, so for sure that day was amazing. No issues so far with the monitor. I am able to dual screen with my laptop for homework and stuff. The only bad news is that there is no audio output or like no speakers from the monitor itself. If you need to, buy a output speaker and then connect it to the output jack back of the monitor. Then you will have yourself a good setup. Honestly, if you are looking for a good price and great quality monitor with almost 24in, look no further guys. This monitor should meet your expectations. I will definitely be thinking about getting another of these babies in the future. Happy Gaming with this! It had all the features I wanted for my dorm room. Two HDMI ports and audio passthrough. Now I can play my Nintendo

Switch without having to buy a separate tv for the dorm. Out of the box the color is terrible, if you are not going to take the time to calibrate this monitor you will be pretty unhappy with it. With some calibration it looks decent but not anywhere near the richness of a IPS panel. My 6 year old HP IPS monitor has better color. The stand is sturdy but does not offer much customization. My box was shipped as just the monitor box, not good if you live in a sketchy neighborhood. If the picture looks bad, who cares about the accuracy. I purchased this looking to upgrade one of my monitors, and I have to say, the Dell IN1910N 18.

5Inch Widescreen Flat Panel Monitor that I still have looks way better than this one, even if it is smaller. And after putting them side by side, the older monitors looked exceptionally better than the new Dell. The seller ANTONLINE advertised this product to have a matte screen with AntiGlare, and all I can say is that it looked dull and as if the entire screen had a glare. The seller did not refund the entire amount I had spent, so all in all, this was a bad purchase. Bad if I had kept it, and bad because I did not see all of my money back and the seller has yet to respond. Try another model and seller. I have had it for only 2 weeks now, so I will change this review if there are problems in the future. The screen is matte and I have it set up with a floor lamp behind me and a lamp on a table behind the monitor. Lamp shades dissipate the light and prevent eye strain, and none of it affects my view of the monitor. I do not think the monitor has a bad picture at all, but to each his own. Apples and oranges. The stand is stable and I love the easy tilt adjustment. I have my PC on its side presently with the monitor on top of it. Its not for the long term but it works. Mainly because of monitor screen and the availability to tilt it up and down which was a must for me. The main complaint why did they label this a gaming monitor when its horrible because whenever I notice moving characters or surroundings in the games I play but maybe that happens when I set the speed to 1ms, theres some sort of distortion or weird lag that follows; I cant quite describe it but its so noticeable when youre playing games. It also came with some light bleed. Other than that, its a solid screen and good price. Aside from a few hiccups in the beginning, this monitor has been great. Ill soon be looking to add a new monitor to make it a dualscreen, probably with this same monitor. So zeigt der Monitor einen leichten Hang zur Streifenbildung und hat an einer Stelle einen leichten Kratzer.

Doch für meinen Bedarf reicht er völlig aus. Ich benutze ihn als Ersatzmonitor für den eigentlich am Arbeitsplatz zu tief stehenden LaptopMonitor, den ich blind geschaltet habe. Das PreisLeistungsverhältnis ist völlig o.k. Der Verpackungsmüll war wohl reichlich. Aber so war sicher gestellt, dass zumindest beim Versandt kein Kratzer dran kommen konnte. Unterm Strich Kaufempfehlung. There is just power cord and VGA cable, no HDMI to connect with laptop. I had to spend extra amount to get connector and then the audio isn't playing. Quite disappointing that even after spending so much money, they don't provide HDMI cable. El unico pero es que solo viene con un cable vga, el hdmi lo tienes que comprar por separado.
