We're happy to help. Hold times are long. Even reliable brands like Bosch are susceptible to longterm wear and tear or an unforeseen part failure. Sometimes the problem is obvious. A wornout seal, for example, will leave a puddle on your kitchen floor. But other Bosch dishwasher problems arent so obvious. Two of the most common are a soap dispenser failure and the dishwasher not filling. Need help finding your model number. Most Common Problems Your Bosch Exxcel or Classixx dishwasher features an electronic diagnostic system for troubleshooting various malfunctions. Sometimes, however, those error codes can be confusing. Have a look at our list of symptoms, then enter your model number in the search field. Well offer you a range of possible causes and help you find the right one. Youll end up with the right replacement part to solve the problem and the confidence to do the repair yourself.

Avoid this costly Customer Instruction service call by getting familiar with these dishwashers' Reset Feature. For many brands and models, the paused wash cycle will automatically start back up where it left off once the door is latched closed. Sometimes machines get old and must be replaced with new ones, other times you move into a new home supplied with Bosch appliances. Some new Bosch owners discover, rather costly so, that many Bosch dishwashers' models do not automatically start back up or unpause when the door is shut. I turned the machine off and on, but that didn't fix it. I think the pump is broken." Before going for a replacement pump or motor, find out if a wash cycle was simply interrupted or paused. Wait five seconds for the dishwasher to respond.

If the control panel is upward facing, concealing the unit controls beneath the countertop when the door is closed often referred to as Incognito Design, try opening the door, press firmly then release the start button and return the door to the closed position, ensuring the door latches firmly. Wait for five seconds; if you hear motor movement the unit was likely in a paused cycle state. Wait for the dishwasher to complete the selected wash cycle and indicate through noise or control panel lighting that the wash cycle has completed. If you want to start a fresh, clean, cycle from the beginning without waiting for the selected wash cycle to complete, perform a reset of the dishwasher. Depending on your make and model, the reset feature will be marked with an asterisk and the word reset located below the applicable button. On many modern Bosch dishwashers, the Reset button is the Start button, this can confuse some customers. To reset the modern Bosch dishwasher, press and hold the start button for about 3 to 5 seconds. On some older Bosch models, the reset feature may be called "cancel" or "drain". These older models require a specific Button Press Sequence or what we in the biz call a Key Dance to complete. Once drainage is complete the dishwasher control panel will indicate a Complete or Done cycle and then automatically enter its standby mode. Totally removing power from an appliance is what we in the Appliance Technician Industry refer to as a Hard Reset. Hard resetting a household electronic appliance should always be done from the Household Circuit Breaker Box. Find the breaker box and switch the dishwasher circuit breaker to the off position. Now check out the hopefully labeled dishwasher circuit breaker. It should be labeled dishwasher or DW for short, and it's usually a 15 to 20 Amp breaker. The dishwasher is now ready to begin a wash cycle from the beginning. You're welcome!

If it didn't, and if you feel like you need professional help but you want to save some money, you can call on Neli. Our certified technicians can walk you through troubleshooting and solving your appliance problems through our advanced camera sharing software and chat. You can request any technician you like, including myself! You can always ask us anything if you pay a visit to NeliHome.com and start a chat. Whether it's a leaky refrigerator or your dryer that seems to take forever, DoItYourself doesn't mean you have to do it alone. Neli's got your back! I think grandbaby may have pressed buttons and locked it up. Can you help Just started chat on the lower right of these webpages and one of our agents will take care of you. You can also set up your own appointment to talk to one of our technicians. You can do that by going here. The wife started the dishwasher and it just sat there. In the morning I turned the water supply on and it still will not run. I pressed and held the start button unit is less than a year old and a code 01 popped up. But it will not run. I have not yet done a hard reset would you suggest that or should I call for service Thanks Do We'd then be happy to help you with more troubleshooting if you'd like to set up an appointment here. Just make sure you understand our service works before booking an appointment I've also taken the drain plug out and there is nothing in there I properly put the plug back and still the washer doesn't work it just goes right to flashing clean and makes no sound I didn't leave breaker

off for 7 mins tho only 4 or so should ai do that Sorry it took so long to answer your comment. You can chat with us on nelihome.com, make an appointment or call 8338760900. We will work with you during your appointment. Talk soon! Team Neli The cycle Auto LED illuminates. If I want to change a cycle type or add a function e.g.

half loaf, which is the function i use a lot, Selecting any new cycle or adding any function does not work. What happens is I select the new function, the corresponding LED illuminates, I hear a chirp BUT the new cycle or function setting DOES NOT stay illuminated. As I had time today to investigate this, I called Bosxh Customer Care. When speaking and describing in detail the sequence of steps, and behavior of resulting steps, she guided me to do a "soft reset" of the dishwasher. Please help! Suggestions If you are still having an issue with your arrow button, you can chat with us or make an appointment. You can also call 8338760900. nelihome.com. Talk soon, Team Neli We will solve your Bosch issue and get your dishwasher working again. See you soon, the Neli Team 8338760900 It's not so much an issue for my wife and I who have become familiar with it, although still a nuisance. But when we have visitors who inevitably disrupt the wash to add a dish because they didn't know it was running, it becomes a real problem. We most often have visitors around the holidays and there's nothing like waking up Thanksgiving or Christmas morning to find the dishwasher didn't finish. Nowhere in the manual does it tell you when or at what stage to engage the button. I'm not very familiar with that feature, but if you want to set up a diagnosis for more testing we certainly can! For the life of me, I can't find the model number on any of the exposed surfaces. If you still need help finding your model number you can try following the guide here I have the Bosch super silence plus 39 abd Thanks for checking us out, we are here if you need us! This was lifesaver info. Worked on our Bosch! Hard 5 Sec push on start worked. Next time I'll probably use hard start. Thanks again There are no lights on the control panel. It was pumping water out when it failed. I checked the powerpoint and it is fine.

Is it worth repairing It's difficult to say without a diagnosis, so if you'd like to set up an appointment you can do that here We are going to return ours. Having Had it for one week we have had nothing but problems with it. What a disappointment because I had a Bosh prior to this that we really liked. They have gone down significantly in their quality. I've tried disconnecting the water supply to check if the filter was clogged but there were only 4 tiny particles that could not be the reason for any blockage. Taking it off power supply hard reset also did not help. If you have any suggestions I'd be happy to try before calling a technician. Now no lights or power at all. Tried turning the breaker off for 57 minutes. We did have a disposal problem too many egg shells, which we fixed a few hours prior to starting the dishwasher. I feel like it is related to the disposal issue, but with no power to dishwasher, my hands are tied. Help please! If this article didn't help you, you can check out our blog or look at our website to see if our online repair service would be helpful to you. You can set up a diagnosis appointment any time! Pushing the start button for 5 seconds resets the cycle but not change the lock position. We still have been using it by putting chairs in front of the door to keep it closed, which works for now, but still a big nuisance. Any ideas how to fix it. Thanks so much in advance! It it's not staying locked, you could try replacing the door locking mechanism entirely. If you need further diagnosing, check out our blog or website and set up a diagnosis with one of our techs. Thanks! Last night it started making a loud noise after the wash cycle. I turned it off and restarted this morning. Any suggestions Really Cool. Really appreciated the wisdom. I will make sure I pay a nice gesture forward to others. Try a Reset Satta market on Bosch Dishwasher Doesn't Work. Try a Reset Sophia on Bosch Dishwasher Doesn't Work.
