The reducedsize receiver and collar are designed for smaller dogs are programmed with 127 levels of stimulation for precise results. Fully waterproof, so you can train even in the rain, this collar has a halfmile range, an LCD screen that displays the exact level of stimulation, and runs on rechargeable NiMH batteries. After that, nothing but trouble. Replacing the batteries is very tricky, but it'll definitely need them sooner rather than later. <http://godilanka.com/userfiles/casio-ef-508-manual.xml>

Customer Service says I can send the unit in for diagnostics, but I hesitate to keep throwing good money after bad. Other reviewers have had similar problems, so if I had to do it again, I'd definitely not by this model, or Dogtra, period. He is sweet as can be, but hes built to run with hundreds of lbs behind him while not focusing on much else. And run he does. We were recommended to buy an Ecollar by a trusted trainer in the area. It is a vibration rather than a muscle stimulation as a way to signal the dog back to you from a long distance. The collar and remote last for a couple days of heavy use for us. It allows our dog to have some freedom to explore without having to worry about him becoming tunnel visioned and running away. This collar is waterproof which is an added bonus because our dog loves to swim. Used correctly, this can be a fantastic tool. This collar has some pretty strong muscle stimulation and if put into the wrong hands, could cause some serious emotional damage to your dog. That being said, weve tried a number of different ECollars and this one is the best one weve found so far. Both owner and dog enjoy the experience. This is NOT a shock collar. This provides muscle stimulation similar to ab and other muscle electrodes humans wear that contract the dogs neck muscle to bring their focus back to the task at hand. It is uncomfortable yes I tried it , but not painful. It goes without saying that your pet should already know basic commands such as come, sit, down, up, etc. Shes four years old and very smart. She was already trained and knew the commands we were giving her. She listened indoors but simply opted to ignore us when she was outdoors and offlead. Like many other dogs, she would head for the forest to chase critters and smell the smells. My wife was horrified at the idea I would choose to purchase a shock collar. I

explained that Ive used them before while training dogs and shock is probably not an accurate term if used correctly. <http://magyarifjak.org/upload/casio-edifice-watch-manual-5123.xml>

The aim should not be to hurt or punish the dog. Rather, just get the dogs attention when distracted by other stimulus this is my opinion, anyway. Instructions should be read carefully before using this device. My fear is people will purchase this device and use it incorrectly. Used incorrectly, this could really be a cruel device; creating a cowering and neurotic dog. If youre hesitating, remember that the person operating the device controls whether it is a cruel device or not. The dog should be trained to know and respond to your commands BEFORE you use this device. Please take advantage of many videos and articles available on the internet which demonstrate proper training and use of stim collars. Dogtra could improve the product by including a DVD or book with training tips. There are lots of ways to use this device but it is not an englishtocanine translator. nuf said. The collar has adjustable stim settings from 0127. Previous collars Ive used did not offer this amount of control. I really think the ability to finetune it is important. Our dog responds when the transmitter is set to 17. I cant even imagine using it set to 127. I required everyone in the house to get shocked by the collar set at 20 before they were permitted to use it on the dog and instructed not to use it above 20. This setting provided a sensation similar to pins and needles when applied to the palm of my hand. My 11 yearold son said it tickled and pulled his hand away. Some dogs or situations may require a higher setting, especially while highly stimulated or distracted, e.g. chasing another dog or pursuing prey. This can be done with the turn of the knob on top of the transmitter. The digital display shows the current setting. The result of of our training using this collar has been nothing short of amazing. I used stimulation at 17 during about 45 minutes of onlead training to reinforce commands she already knew. Ive only had to used the stim button twice.

This was the first time I let her off lead. My wife and sons say theyve only used it one time; only the first time they had her offlead. The collar also has a paging mode which makes the collar vibrate like a typical cell phone. Ive tried this but did not train her with it. She looked confused the first time I used it but she did look back at me and obeyed my command. From now on, I think Ill use it first. Overall, I really believe its made her life more enjoyable. Shes able to run freely and play offlead which she really loves. We have not had to push ANY buttons on the transmitter since those first days of training. Your mileage may vary. For us, this collar has been a miracle. The collar is made well and a good size. Its easy to set up and use. It recharges easily and the units hold a charge for many uses. The transmitter seems to last longer must have a larger battery. The LED on the collar indicates when the battery is low. I can confirm its waterproof since shes been swimming several times while wearing the collar. I like the new LCD screen which shows battery life. Collar is a bit difficult to cut but maybe I needed something more than kitchen scissors. I now have a new dog and am more relaxed when she is out and about. Highly recommended. I almost never use the electric mode as the vibration mode works very well on my dog. This training collar was recommend to us by our trainer. The vibrate function on this works wonderfully for 95% of corrections for our dog. The controls are simple to use, and the buttons are placed so that it is difficult to confuse the functions. We have received training in how to use this with our dog and would not recommend purchasing without also receiving professional training if you have had no previous experience with Training Collars. The battery life on this unit is phenomenal. Would definitely recommend. In order to navigate out of this carousel please use your heading shortcut key to navigate to the next or previous heading.

The 282NCP Platinum is gentle enough for even the mildest mannered dogs. The transmitter for the 282NCP has controls for three levels of stimulation; "Nick" which emits a single rapid pulse of electrical stimulation, "Constant" which gives continuous stimulation for as long as the button is pushed for up to 12 seconds, and "Pager" which will give a nonstimulating vibration for as long as

the button is pressed for up to 12 seconds. On the Dogtra 282 NCP Platinum transmitter, the two dog unit, there is a toggle switch for "Nick" and "Constant" with color coded buttons for each of the collars. Each 282 NCP Platinum transmitter is compact in size and weighs 4.8 oz. which makes it easy to carry in the field on either a lanyard or on your belt buckle. The transmitter contains a rechargeable, userreplaceable NiMH battery, which with proper care will provide years of service. The collar for the 282 NCP is made of durable and easily cleanable Biothane and is designed to fit a dogs neck up to 28". The collar weighs 5.4 oz. The receiver also has a LED light which indicates the current charge of the collar. When the light flashes green the battery is fully charged, turns amber when the battery is at medium charge, and starts blinking red when the battery needs to be recharged. It is fully rechargeable with NiMH batteries which with proper care should have a life span of 35 years. Features of the Dogtra 282NCP Platinum. Three bar battery life indicator and LED colored indicator to show remaining battery life Also available in a onedog system Dogtra 280NCP Once the first and second year warranty coverage expires, the Limited Lifetime Warranty will cover for all parts except accessories and labor fees. Labor fees and shipping fees incurred are the customers responsibility. Labor fees will be variable depending on the extent of work required. The Limited Lifetime Warranty will expire 5 years from the date a model is discontinued in production by Dogtra Company.

If your product is not registered and proof of purchase is not available at the time of service, Dogtra will estimate the age of the unit by the serial number. Serial number estimates can be different than the actual purchase time. Without proof of purchase or product registration this is the only method they have for determining the approximate date of purchase. I placed an order online and realize I ordered the wrong items. I telephoned your company and dealt with one of the customer servi. Gratefully yours, LaWana M. Twin Falls, ID Just wanted to provide feedback on my experience ordering from your website. The rep, Jeff, that took my order was really helpful. He listened to my needs and situation and made recommendations based o. Erin K. New York, NY View More. Customer Ratings Snapshot 5 Stars 8 4 Stars 2 3 Stars 0 2 Stars 0 1 Star 1 Total Reviews 11 Everything changed when we adopted 3 more dogs. We just couldn't handle them especially when we go on walks. They would constantly pounce on each other or pull and bite on their leash. I can't let them off the leash coz they will surely run away. My problems disappeared when I finally decided to use Dogtra collars. This collar has helped me interact with my dogs. I love its features such as the digital display, the additional vibrate mode, the various levels available, the rechargeable batteries and the excellent range. I also like its sleek design. It is also great that this product is waterproof since two of my dogs are fond of taking occasional dips in the lake. All dog owners with dog problems should try this product out. Was this review helpful to you. ByWhences Dogtra 280NCP Platinum is excellent! 5 out of 5 Summary I was thinking of writing this review later when I have already tried it out in all situations I could think of but I just can't wait. This product has totally

changed my dog. Before using this collar, he was stubborn and he was very fond of outsmarting me, running around and doing whatever he wants. This product is truly a lifesaver. Now, my dog is very obedient and he is now able to look me right in the eye. He listens to my every command. My dog immediately learned after a few sessions of training. The best thing is that I only had to nick him twice and use the vibration in 5 or 6 instances. It's been 2 days since I've stopped switching the collar on. I just simply put it on him and give out my voice commands. So far, my dog has been very obedient. I hope this will keep on forever. I'm not sure if this product will work well with others. But as Dogtra recommends, it is best to use this product if your dog already has previous training on voice commands. Otherwise, he will not understand what is going on.

You will just harm your dog with the constant correction each time you correct him for not obeying a command that he doesn't understand in the first place. For me and my dog, this product has been very effective. As I've said, I only nicked my dog 2 times and have never resorted to using the constant button because we never really needed it. With my dog's size around 100 lbs, I have kept the level of the control to around 2535 and never beyond this. I'm really happy with this product. And I think my dog is the happiest of all. He happily comes to me whenever he sees the collar because he knows we will be having so much fun. I highly recommend this product. Was this review helpful to you. ByHatecrable Keeps my dog from running away 5 out of 5 Summary We have a 2 year old Newfoundland who used to love to run around and take a swim in the nearby pond even if we tell him not to. With the Platinum Dogtra electronic dog collar, our dog's behavior significantly improved. I can easily get his full attention and he follows every command that I call out to him. I'm very happy with the results which I got after only using the nip button twice. Now, I'm only using the vibrate mode to gently remind my dog to follow good behavior. The collar is waterproof which is just appropriate for my dog's occasional swim in the pond. The collar has also excellent range. Pros Waterproof, Excellent Range, Best Results I would recommend this product to a friend. Was this review helpful to you. ByDaymeculd An excellent choice! 5 out of 5 Summary I agree with the review of another user of this product when she said that Dogtra 280NCP Platinum product is excellently made, with careful consideration of the users. I have no issues with the battery. It is working perfectly. I'm also pleased with the range which I believe is as they claim it to be. But the best thing about this product is that it has various stimulation levels for you to choose from.

As recommended by dog collar makers, start with the lowest stimulation then gradually adjust according to your dog's response. Keep in mind that if the level is too low, your dog will not be able to feel the correction. On the other hand, if it is too high, your dog may get too excited to respond as you please. This collar has given me a wider option. Normally, I use level 18 out of 127 available levels. But if my dog seems to be too distracted, I increase it to 510 levels higher. In the case of collars with only 810 settings, what would I do if level 2 is too low but level 3 is too high for my dog The receiver on the 280 is smaller than the 1900. This is just enough for small sized dogs such as our 50 pound GSD mix. I just wish they were more thorough with their training materials. If you want to learn more about how to use this product during training, you will have to do more research and look for training materials which are available online. Was this review helpful to you. I bought Dogtra 280NCP Platinum electronic dog collar for her with high hopes that she will finally obey my voice commands. Lucky for me, this product worked without a hitch. When she is wearing the collar, she turns into this obedient puppy but without the collar, she just runs wild. I'm really grateful for this wonderful product. Some may not believe this, but it saved my dog's life. There was this one time when I forgot to close the front door and she darted out into the street. Good thing she was wearing the collar. I simply pressed the nip button at full power and she immediately stopped running and walked back into our house. I cannot bear the thought of what could have happened if she crossed the street with all those cars passing by. I highly recommend this product for training. It is quite highly priced but it is worth it. Was this review helpful to you John thanks for all your help and professionalism. Have a great holiday. The rep, Jeff, that took my order was really helpful.

With LiPolymer 2hour quick charge batteries and a LCD screen that displays the stimulation level even in poor lighting, this highperformance e-collar is always ready for your next training session. The warranty begins from the date of purchase. For the first two years, coverage is for both Parts and Labor on warranty repair services. After the first two years, the Limited Lifetime Warranty covers Parts only and does not cover Labor Fees and Accessories. All Shipping fees incurred, the cost of Accessories after the first year, and Labor fees associated with out of warranty repair work, are the customers responsibility. Labor fees will be variable depending on the extent of the work required. The Limited Lifetime Warranty expires 5 years after a model is discontinued from production by Dogtra. Learn how your comment data is processed. Pointers and Flushing dogs. Our 280 NCP Platinum is an entrylevel sporting dog unit with low to medium power. The new 280 NCP Platinum is gentle enough for even the most mild mannered dogs and with all the desired features of our proline collars, this trainer bridges the gap between our popular pet trainers and our Proline. It incorporates many of the same features as our Proline series at a more affordable price. Throw in Dogtras industryleading durability and valuepricing, and you can see why the 280 NCP Platinum is at the top of its class. The Nick is used as a substitute for leash corrections when the dog is off lead. The Nick is mild but motivating. The collar will reactivate when you push the button again. It allows you to train with a nonelectrical type of stimulation. It's a great attention getter giving you added training finesse. Exclusive Features No preprogramming needed. One is the lowest setting and 127 is the highest. The dial works like a rheostat, gradually increasing the intensity graduating up to the necessary level in a linear progression no steps or increments with no jumps between intensity levels.

The intensity selection dial is located on the top of the Transmitter. In the fully counter clockwise position "zero" setting, no electrical stimulation occurs even when the Transmitter button is pressed a safety feature. Moving the dial from the zero setting in a clockwise manner, electrical stimulation will begin at a lower setting. Continuing clockwise will increase the stimulation level in a linear progression no steps or increments up to the highest level 127. Conversely, moving the dial counterclockwise, the level reduces in a downward linear progression until at the "zero" setting fully counterclockwise. This feature allows for subtle adjustment of the level upward or downward while the transmitter button is held down continuously providing elinear training. Please refer to the top of this page to order our 2 dog model. The antenna is inside the Receiver. The Battery Charger and

charging cables allow you to charge both the Transmitter and Receiver at the same time. The Battery Charger is designed for a 110 volt wall outlet. Please refer to the top of this page to include one with this purchase. In deciding which collar is the right one for your dog, please note that it is always best to have a unit that has some power in reserve for critical training situations and also for when your dog matures. Buy with Confidence! Once the labor warranty has expired, all repairs will incur a variable labor charge depending on the extent of work required. We highly recommend filling out the warranty registration card that comes with your Dogtra unit and mailing it in along with a copy of your receipt or registering your product online at the manufacturers website within 30 days of purchase in order to qualify for the Limited Lifetime Warranty. Dogtras warranty DOES NOT cover repairs or replacement due to misuse, improper maintenance or lost units. Any water damage on Water Resistant Transmitters 175NCP, 200NCP, 202NCP will not be covered.

All replacement costs for either the transmitter or receiver are the owners responsibility. The Limited Lifetime Warranty will expire 5 years from the date a unit is discontinued in production by Dogtra Company. Batteries, or the labor to replace them, are NOT covered under the warranty after the first year. The warranty is void if the unit has been altered or an unauthorized person has attempted repair work. NO SHIPPING TO P.O. BOXES! A valid street address must be supplied. Please note that we do not add any handling fees of any kind to your shipping quotes. Orders are normally shipped within 1 business day after payment has been received and cleared. We accept payment by personal check, money order, cashiers check, electronic funds transfer or major credit card or debit card. Please be aware that payment methods other than by major credit card or debit card must clear before your item can be shipped. Rating Bad Prior return authorization required.
