Boxer owners might be interested in the Peugeot Boxer service manual to help them keep their boxing running. In a joint venture with Fiat, Peugeot began to produce a line of light commercial trucks called the Boxer. Originally this truck was called the Peugeot J5 in its first generation. It was a 2.5ton capacity van. The J2 featured updated front grille and headlights. The J ran from 1981 1993. The second generation rolled out in 1994 and was named the Peugeot Boxer. In France this truck sold well, although outside of France it was overshadowed by the Fiat Ducato. The second generation ran from 1993 2006. This generation had a choice of 4 engines.

All of these options were compliant with European standards. Additionally, the company offered a scheduled maintenance program for vehicle owners. Consumers could purchase the truck with either a 5speed manual transmission plus reverse or an automatic transmission with 4 speeds and reverse. The passenger version of this truck was able to seat 69 people. This vehicle was equipped

with a 2.3liter JTD 16v engine. There was also a Combi version of this truck. This version combined both the commercial aspect and the passenger version. It could fit up to 9 people and still have room to transport goods. The Combi was available as a 1 ton, 1.4 ton and 1.8 ton. The second series of this generation was released in February of 2002. The rear and side moldings were updated as was the front grille. In 2006 the third generation was released. This generation was also intended to be for both people and commercial use. The 3rd generation van was available in 3 different wheelbase lengths and 3 different heights. The weights for the generation were also increased. The Ram Promaster was released in North America. This was the 3rd generation of the Boxer. The truck was designed with a unibody construction and AWD. By 2014, the fourth generation was ready to be released. Most of the changes for this generation were redesigns and style updates. The front end was given redesigned headlights so that it had a more carlike appearance. The ProMaster was also updated with a revised grille, increased payload and improved towing capability. The Peugeot Boxer has proven itself a strong competitor in the light commercial truck category. Owners of any of the versions and generations of the Boxer should consider downloading the Peugeot Boxer workshop manual pdf as a point of reference for their vehicle. Bizarrely, all of the pages although in the right order were printed upside down. Further, the content was not centred on the page and part of the text was missing, so it was not even possible to read it upside down and from right to left.
