So, for you who want a fast access to get certain information here, all the things you need to do is clicking on the subtopic below.

Contents show 1 Introduction to Canon EOS Rebel 2000 Manual 1.1 Overall Look of Canon EOS Rebel 2000 1.2 Canon EOS Rebel 2000 Specification 1.3 Canon EOS Rebel 2000 Features 1.4 Canon EOS Rebel 2000 Price 1.5 Canon EOS Rebel 2000 Manual Introduction to Canon EOS Rebel 2000 Manual As it is always stated before, a manual is something important as a product complement. This manual book is like a gate that takes users to the certain understanding of the product itself. Therefore, the best way to understand a certain product is by referencing to the manual. That's the reason of why do we commit to bring Canon EOS Rebel 2000 Manual to you. With this manual, we would like to help you in understanding or even solving the issues happen to your Canon EOS Rebel 2000 camera, the major and minor ones. Related article Canon EOS Rebel T5i Manual User Guide for Upgraded Rebel Version Overall Look of Canon EOS Rebel 2000 Before directly jumping into the Canon EOS Rebel 2000 Manual, we will talk about the specification of this product first. As far as we know, by reading the specification, it will be so much helpful for you to understand the product deeper. And to begin this conversation, we choose to talk about the most obvious thing first, which is the overall look of this camera. Talking about look, this camera looks stylish with its 5.53.52.3 inches of dimension. And handling this camera will be so much easier since the size is felt just right in your hand. Moreover, it is also supported by very light weight. With those dimension, the weight of the camera is only weight for about 12.52 oz with two batteries and memory card included. Further,

considering the importance of viewfinder, Canon sets fixed eyelevel pentaprism over this product. It covers 90% of field coverage with 0.70x magnification.

Related article Canon EOS Rebel T6 Manual, a Camera Manual for Beginner Photographer Canon EOS Rebel 2000 Specification As you will see at the Canon EOS Rebel 2000 manual, the camera has been completed with high level of specification. The laser matte and autofocus frame are going to help you in getting the best focus for every images you take. You might get the difficulty in capturing images in overcast area with this camera. So, for that reason, the manufacturer builds flash to create a daylight image result. The flash model brings so many features such as auto mode, flash OFF mode, fillin mode, and redeye reduction. As we all know, analog camera with film roll might looks a little bit old fashioned. But, it has always been the favourite gadget for its lovers. Considering this thing, Canon decided to produce Canon EOS 300. Looking further to the specification of this product, it is bundled with 28mm lens with 2 seconds recycling time. The lens is able to make an optical zoom up to 2.8 times. And to get maximum focus, you need to place your camera in minimal focus distance for about 15 inches. Related article Canon EOS M10 Manual, a Guidance for Elegant and Classy Canon Camera Canon EOS Rebel 2000 Features Further, based on the Canon EOS Rebel 2000 manual, there is one thing you would definitely like about EOS Rebel 2000. It is the AF Illuminator feature. This feature brings the perfect bokeh and focus that is impossible to be done by similar product. Remote Control feature becomes the next thing to be noticed. It gives you the easiness to manage the operation of your camera by certain remote tool. And to support the images hunting process, EOS Rebel 2000 is completed by LCD display Information. This LCD shows you aperture, remote control indicator, autofocus mode, battery condition, flash mode, program, frame counter, selftimer mode, and many more.

Based on the concept of "easier to use and more comfortable" than the former model, it is smaller and lighter weight. It also has a higher performance AF system, exposure control and other basic features. A seven focusingpoint wideview AF system is used instead of the conventional three focusingpoint AF. This camera has 35zone evaluative metering instead of the conventional 6zone metering, ETTL flash exposure control linked to an active focusing point, and other basic features, such as easy depth of field preview, higher speed of 1.5 fps film advance, shorter viewfinder blackout time, midroll film rewind button and a wireless remote control Japanese model only. The camera is compact, but the command dial, the main dial, an external LCD display, and a small, yet comfortable grip ensure a good handling of the camera. The camera body is twotone silver and black. The Battery Pack PB200 for sizeAA batteries with a verticalgrip shutter button is separately available 4,500 yen.Manual focusing is possible. Focusing point selection Manual or automatic focusing point selection in P, Tv, Av, and M shooting modes. Automatic selection in other modes. With manual focusing point selection, focusing is done at the selected point. With automatic focusing point selection and oneshot AF, the nearer subject has a higher priority. With automatic selection and AI servo AF, once a moving subject is in focus, the same focusing point is active for focusing while the subject is moving.

The vertical and horizontal positions of the camera are detected to optimize the algorithm for automatic focusing point selection. Focusing point indicator On the external LCD panel and LCD in the viewfinder. AF infocus indicator On the external LCD panel and LCD in the viewfinder, and beeper. The beeper can be turned on or off. AF operating range EV118 ISO 100.Electronic selftimer 10 sec., cancelable on the halfway.Magnification 0.7x. Vertical and horizontal coverage 90%. Standard diopter 1 diopter with 18.5mm eye relief. Standard eye cup Eb. Quick return half mirror. Depth of field preview. Angle Finder B, Magnifier S, rubber frame Eb, Diopter Correction Lens E, and Eye Piece Extender EP EX15 are available as eyepiece accessories. Export models need the Panorama Adapter. Metering system Evaluative metering. Partial metering at the center about 9.5% of viewfinder screen. Centerweighted averaging automatic setting in manual exposure mode. Multiple exposure Up to nine multiple exposures. Automatic cancellation after shooting and cancelable on the halfway. Guide number 12 ISO 100 in meters. Recycle time approx. 2 sec. Flash coverage 28mm lens angle covered. Flash exposure metering Offthefilm metering threezone TTL automatic flash linked to the active focusing point. The flash metering is weighted linked to the selected focusing point. In P, Tv, Av, M, ADEP modes When the flash button is pressed, the flash pops up and fires. In Full Auto, portrait, closeup, night scene, in low light and backlight conditions Automatic popup and firing. Flash level compensation Automatic reduction for backlight conditions and fillin flash. With ML3 TTL program flash AE. Inserted into the grip from the bottom. The battery level is shown in four steps on the external LCD panel. First, the entire roll is wound on the takeup spool. Then each time a picture is taken, the film advances back into the cartridge. Automatic film transport with the builtin motor.

Film rewinding After all frames are shot, the film leader is automatically rewound into the cartridge. Midroll rewind possible. Each interval represents a 15 day period. There is no guarantee that items will always be listed at a price within the provided range. Having said that this camera is fast. Super quick focus and film advance. Its a film camera that resonds like a DSLR. Its small and compact for an SLR and a great camera for those just getting into film photography.. Read full review Read less

Verified purchase Yes by goodoljack April 25, 2018 Solid little film slr The Canon EOS Rebel 2000 was one of the last great film cameras before the digital revolution. It is a really great little camera. Its super lightweight and has a lot of great features. The image quality of the Rebel is top notch, and with the ability to scan negatives and being able to archive your developed negatives, your images are protected forever. No worrying about when, not if, that hard drive is going to crash; because it is going to crash. Negatives saved in albums are forever. On of the many reasons so many people are coming back to film.. Read full review Read less Verified purchase Yes by charlesosborne2002 September 13, 2017 Just what I wanted I was delighted with this, and surprised at how light it was for a full frame SLR. I wanted something for full frame and could not afford digital. I have a Canon digital 650D like the Rebel series, so the Canon EF lenses work on both, or my M42 screw mount manual lenses with adapter work on both. Most of the features are alike in operation. For important photos I can shoot APSC in digital and full frame with film.. Read full review Read less Verified purchase Yes by bdiana46 March 02, 2017 Cannon EOS Rebel 2000 The picture quality is amazing for the pictures I need to take for my photography class and the camera is in a surprisingly excellent condition.

It had a full battery, all of the buttons and nobs worked, and hardly any scratches on the camera so it was almost like new. I like that this camera has an automatic and manual program to choose from. Unless you dont know how to work the iOS, exposure and shutter speed then automatic is for you.. Read full review Read less Verified purchase Yes by lcml dau4lfl1ia July 05, 2016 I love it. Best film camera I ever had the pleasure of working with. Its feel light and nice on my hand. Easy to use and has automatic focus. The only thing that I may not like is the sound it makes when I photograph someone without them noticing. Other then that it the best camera ever!. Read full review Read less Verified purchase Yes Show more Show less by jke6344 August 13, 2011 Very disappointing I have used 2 rolls of film and the quality of the prints is poor. The pictures are grainy and grayish. The color is poor. I am very disappointed in the product esp. Used Very GoodBy now you know it is a 35mm film camera that uses film instead of memory card and it will come to you with Canon strap and body cap. Buy Before end of this month and will include a special bonus for you One 35mm film roll Best Deal For You!!!!Please try again.Please try again.Please choose a different delivery location.In order to navigate out of this carousel please use your heading shortcut key to navigate to the next or previous heading. Register a free business account Please try your search again later.It has a retractable flash and 11 versatile shooting modes. Its small, light, and supports advanced flashmetering system features including ETTL, FE lock, and highspeed synch modes with EXseries Speedlites. It has a full range of features including remote control socket, depthoffield preview, and scalemetered manual exposure. Creative controls include a seven point autofocus system, 35zone AE metering, programmable portrait, landscape, closeup, sports, and night scene modes.

Advanced features include a choice of evaluative or partial metering patterns, AE lock, auto exposure bracketing, multiple exposure, and more. The EOS Rebel 2000 is fully compatible with all EF lenses and EOS Speedlites, including Canons latest EX series with ETTL, FE lock, and highspeed synch modes for incredible flexibility in creative flash photography. The EOS Rebel 2000 Date body includes date and time imprinting so you can keep track of your photos.To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. Please try again later. Tom Tallerico 5.0 out of 5 stars It has a wide range of shutter speeds ranging from 2000 to bulb.Plus it is very light making it easy to carry around.For me, a amadorist photographer is perfect camera SLR. I need this camera to take pictures from climbs, camps, and so. And my sister take pictures from your architectural projects. You must have JavaScript enabled in your browser to utilize the functionality of this website. Sell your camera today and get top market value. Shows moderate wearGlass may have slightEquipment may or may not work. No warranty or return privileges. With its convenient builtin retractable flash

and 11 versatile shooting modes, the EOS Rebel 2000 lets you get great photos of vacations, sporting events, landscapes, portraits and more. Smaller and lighter than ever before, the EOS Rebel 2000 incorporates a full range of basic features including depth of field preview, scale metered manual exposure and 10 other shooting modes. Advanced features include a choice of evaluative or partial metering patterns, AE lock, Auto Exposure Bracketing, multiple exposure and more.

The EOS Rebel 2000 is also fully compatible with all EF lenses and EOS Speedlites, including Canon's latest EX series with ETTL, FE Lock and High Speed Sync modes for incredible flexibility in creative flash photography. Many experienced photographers fondly remember starting off with this beauty now available only as a used item. If you're somewhat new to photography, check it out for a solid, proven option to our hobby. You are free to modulate the aperture, shutter speed, and flash to your taste. This camera also has an EF lens, thereby producing excellent prints. You will absolutely notice the difference. These lenses have a built-in motor for automatic focusing. After using this brand for a while, I can conclude that it is well suited for night pictures as its metering and flash modules ensure perfect exposures and shots with that "wow" factor. Because this camera is only available as a used item and at very reasonable prices, you can splurge on some accessories to put it through its paces. Having a hand on the manual controls gives you the perfect meter counts. For most photographers, the presence of aperture priority functionalities and shutter speed moderation makes the camera a good choice. The autofocus mechanism here is primed for responsiveness and this offers seven points of focus you can align with when choosing your snap points. The creative shooting edge for you as you photograph your points of interest is explosive on a positive note. You also have the auto bracketing and multi exposure modes to play with as you like it. What's not to love. In tricky lighting situations, try exploring either of the two available full stops so that you can maneuver the metering position of the camera. Along with its pop-up flash which is solidly built-in, you can get an additional flash. Improved functions for quiet operation and faster AF. 7-point selectable autofocus system with 35mm metering methodology.

FE Lock, ETTL, and sync modes of high speed that is compatible with Speedlites on EX series. 10 shooting modes as well as manual exposure for scaled metering along with remote control socket and depth of field preview functionalities Exposure Bracketing, AE lock, and creative controls platform including multiple exposure options for your full photographic expedition. It is a great value and a great start or addition to your camera collection. Filmcameraexpert.com is a participant in the Amazon Services LLC Associates Program, an affiliate advertising program designed to provide a means for sites to earn advertising fees by advertising and linking to Amazon.com. You can add it! Designed under the supervision of Yasuhiro Morishita, the camera was intended as a replacement for the Canon EOS 500N. The camera was a success for Canon, selling exceedingly well and dominating its market sector until it was replaced by the EOS 300V Rebel Ti, Kiss 5. Canon EOS 300 won European Imaging and Sound Association Award 1999/2000. Like other low priced SLRs of the time, the EOS 300 used a Penta mirror viewfinder instead of a pentaprism, and had a polycarbonate body. The autofocus capabilities of this camera were identical to Canon's much more expensive Elan 7 with six single line CMOS sensors surrounding a central cross type sensor. The EOS 300 should not be confused with the later Canon EOS 300D EOS Digital Rebel in the US and EOS Kiss Digital in Japan, a popular entry level digital SLR from 2003.
