Highlight Movie Maker A versatile tool to streamline movie editing, Highlight Movie Maker offers several timesaving features. Add highlight markers to key moments while recording, and let the software automatically sync your transitions to your chosen soundtrack. **Motion Shot Video** Motion Shot Video plays a sequence of superimposed images that trace recorded action in splitsecond intervals for you to analyse in detail. During playback, you can adjust the interval, or pause to capture and share a still image. **Builtin USB cable** The builtin USB cable stowed in the hand strap is very convenient for extraquick charging and connection to a PC, so there is no need to pack a bulky extra USB cable or AC adapter. For charging without a PC, use a compact ACUSB adapter optional. Put your video camera in still image mode and capture amazing highquality 9.2megapixel single images as easily as you do with a still image camera. So a still captured from a movie recorded in progressive mode looks extrasharp. **Dual Video Recording** Record two movies at the same time — one in the maximumquality XAVC S or AVCHD format and another in MP4 format. That way you've got a small file ready for instant sharing, plus a professionalgrade file for further editing. **Dual Record mode** Dual Record mode enables you to shoot HD video and highresolution still images simultaneously to capture the best shot in both ways. **Face Detection** This automatically optimises focus, exposure, and colour for best results. Select someone to be prioritised simply by touching their face on the LCD display, which is useful for selecting a key person when shooting at a crowded event. Even if the subject leaves the frame, they will be remembered and prioritised upon reentering the scene. **Intelligent Auto** This feature automatically determines the type of scene being shot and optimises a combination of settings from three groups Face, Scene, Camera shake.

It provides the best results for 90 scene types, even at night and in backlit scenes. Selected settings are displayed as icons on the LCD screen for easy reference. **Smile Shutter** Because great smiles are fleeting, this feature ensures they're never lost. Automatically capture snapshots of smiling faces, even while recording video. You can choose from different display schemes from event view or index view as needed, for better organisation, searching, viewing, and sharing of your personal content. **Picture Effect** Give free reign to your imagination. Picture Effect expands movie and photo enjoyment by letting you add up to seven creative effects Partial Color, Retro Photo, Soft Highkey, High Contrast Mono, Toy Camera, Pop Color, Posterization without troublesome editing on a computer. **Manual settings for iris and shutter speed** This camcorder gives you freedom to choose manual settings for iris and shutter speed control when shooting under backlit and underexposed conditions, as well as in other situations. Plus, the builtin Memory Stick PRO Duo media slot makes it quick and simple to share your images. The Carl Zeiss VarioTessar Lens and Super SteadyShot image stabilization capture sharp, clear, detailed video so you can see every detail of every frame. Shooting, composing, and reviewing video or still images is made easy with the clarity of the 2.7inch wide LCD screen. Super NightShot Plus technology lets you shoot color video in total darkness. Plus, the builtin Memory Stick Pro Duo media slot makes it quick and simple to share your images. The Megapixel technology enhances your digital videos and digital still photography performance. In addition, Digital Zoom Interpolation means that extreme digital zooming is clearer, with less distortion than previous types of digital zoom. Professionalquality Carl Zeiss VarioTessar lens Carl Zeiss VarioTessar lenses are designed specifically for compact camcorders, and utilize precision ground optics to maintain the sharpness and contrast found with larger lenses. 2.7inch touchpanel SwivelScreen LCD The 2.7inch LCD screen provides exceptional viewing clarity with 123Kpixel resolution. The display rotates up to 270 degrees for multiple viewing angles, as well as provides sharp, detailed images for monitoring or playback. Additionally, Sonys exclusive AccuPower meter displays the battery time remaining in minutes, in either the viewfinder or on the LCD screen. Stamina Battery Power Management System When using the Sony InfoLithium Battery, the Stamina Battery Power Management System helps the camcorder prolong battery life for extra long continuous recording times from a single charge.

Tele Macro function Images shot in the Tele Macro Mode help your subject stand out by properly focusing the subject while leaving the background unfocussed. The Tele Macro Mode is useful for shooting closeup shots, especially when you need to prevent the camcorder from casting a shadow on the subject. Manual focus Manually adjust the focus of the camcorder using the touch panel. Manual focusing also allows the user to control the focus in difficult situations where either the environment or the subject does not allow the camcorders auto focus to perform optimally, such as when shooting through a window or in a crowded environment. Super NightShot Plus Infrared System The Super NightShot Plus Infrared System uses a slow shutter mode to let you shoot video with improved color and contrast, even in total darkness 0 lux. Scene Selection Modes Scene Selection modes make recording easy even when filming in challenging situations. Picture Effects Get creative when recording or playing back your videos with Sonys Picture Effect Modes. Effects available in Camera mode Monotone, Pastel and Sepia. Effects available in Playback mode Monotone, Pastel and Sepia. Fader effects Enhance your personal videos by adding professional looking fader effects. Choose from Black and White. Onscreen Zoom and Record buttons For additional control of the camcorder, Zoom and Record buttons are features on the frame of the LCD screen. This allows for more flexibility when holding the camcorder, especially in overhead or lowangle shots. USB streaming Stay connected to family and friends by broadcasting live video with audio over the internet using the USB interface. You can even playback your favorite recorded scene on the camcorders tape. Its like having your own video conferencing system. Easy Handycam button Using a camcorder can be intimidating for some people.

Vuelva a intentarlo en otro momento. I hooked up this used like new DCRHC62 handycam Camcorder to my Toshiba DVD and VHS combo recorder and started recording my old miniDV called DVC, stands for Digital Video Cassette tape cassette tapes to a dvd disc. I had to get my middle son 23 years old to help me but he finally figured it out for me. Burnt dvds came out great. I purchased the Toshiba Combo Recorder from Amazon, too. Happy and satisfied with this purchase. I would recommend Quality Discounts. Only con, its very difficult for older people 5660 year old to open the remote controller battery compartment, to replace the CR2025 battery. We got our son to open for us, too. Thank God for our helpful children! It takes me forever to decide on electronics to buy because I am very picky. This camera has lived up to all of my expectations and more. I was not in the market for a professional camera. I wanted a good to better quality camera to film trips, sporting events, and everyday life.

This camera does it all. It takes amazingly crisp video as well as still images. It has been bumped and banged on many trips, including overseas, and has survived quite a few falls. It has been in the rain not recommended, snow, heavy wind on a beach, and nearly met with the Mediterranean sea. It still keeps going. Battery life is not the greatest. I would strongly suggest a second battery. The touchscreen is responsive. For editing, Microsoft Movie Maker works, but I have Sony Platinum Studio 8 and the camera downloads quickly and easily to it. Strangely, Sonys higher end high definition camera HDRSR5 does not have this feature. I have been quite satisfied with this features flexibility and userfriendliness. For some reason, the smooth interval recording has a 12 hour time limit, so if you want to do time lapses longer than 12 hours you have to stop the recording a couple times a day and restart it and it will go for another 12 hours. For regular video usage its a good camera. The 2000x digital zoom, if you havent guessed, is comically useless not that I expected anything more. The telemacro capabilities are pretty impressive. As others have mentioned, it does not come with a firewire IEEE 1394 cable that is required if you want to download video to your computer. Also, the audio was significantly compressed after I uploaded the video so its not quite what you would hear straight out of the camera. I had bought and returned a Sony mini DVD camcorder after finding the results to be pretty poor. I didnt want to spend the dollars to move up to HD, and people told me that Mini DV was the highest quality image one could obtain short of going to HD. After having the camcorder for about a week and using it a couple of times, I am overall pleased with the purchase. The camera does pretty well in relatively low light, and the sound is good too. My goal for this purchase is making movies of the family, not shooting a documentary, and for this purpose I think it is fine.

It is easy to use, and the touch screen is fine some reviews said it was too small, but honestly I think it is fine. On the negative side, it is lighter than I thought it should be. I am someone who judges quality on heft, but I guess that is really not that relavent. Some might consider it a plus this camera is super light. Also, some of the covers over the various inputs and outputs are pretty flimsy and look like they might break down the road. But for now, everything is fine. Finally, as some of the other reviews mentioned, it does not come with a cable to connect it to Sonys VRD device, which I also bought. However, the cable is cheap here on Amazon, so you might want to buy one now to have it available. UPDATE Sept 2017 still using the camcorder and it is still working great. UPDATE Sept 2019. Still using it. Still pretty good. Excellent picture, electronic image stabilization. Excellent electronic image stabilization. Takes 1hr. of video per cassette. Controls are logical, easy to find. I posted a video of one of my time lapse videos and have this camera always filming more. The camera works so well I ended up getting two. One for personal film work and the other for time lapse. Night vision is pretty good and with added infrared lights you can get some nice night shots. Add filters and creativity you can do a lot with this camera but it is also small enough that it is great for carrying around with you without getting in the way. Small in size, big on features. The ultracompact

Sony DCRSX85 DCRSX85E features 16GB of builtin Flash memory, you can capture up to 12 hours of video LP mode. A professionalquality Carl Zeiss VarioTessar lens delivers sharp, highresolution images while a powerful 70x extended zoom lets you capture extremely tight shots, even from far away. Additional features include a 3.0inch touchscreen Clear Photo LCD Plus display 230K for framing and reviewing your footage.

Theres also builtin LED video light which is perfect for low light situations. DCRSX85 builtin zoom microphone focuses audio recording on your subjects with the cameras zoom lens, helping memories ring true with clear dialogue and crisp, discrete sounds. Intelligent Auto mode goes a step beyond traditional auto modes by analyzing your shot and then automatically selecting the appropriate settings from seven distinct scene modes 36 different combinations possible Landscape, Backlight, Twilight, Spotlight, Macro, Portrait, Tripod.
