I was watching a porn film starring Jordi El Nino and was wondering how big his little fella might be? Nothing sinister about me asking his size. I just wanted to compare my John Thomas with Jordi's Haha ha ha ha ha ha ha Never compare the dick of a porn star with yourself. They are well-endowed, and it is either natural or takes a lot of exercises to reach there. From the various threads that I have read, I think Jordi's Johnson is around 7 inches; the girth is 5.25. I can be wrong because of all the camera tricks. Haha ha ha ha ha ha Never compare the dick of a porn star with yourself. They are well-endowed, and it is either natural or takes a lot of exercises to reach there. From the various threads that I have read, I think Jordi's Johnson is around 7 inches; the girth is 5.25. I can be wrong because of all the camera tricks. I think 7 is less for a porn star. It should be around 8 or more. After all, he is a fu***ng porn star. I think 7 is less for a porn star. But I think that Jordi's John Thomas is not huge or even massive, but I will say it is large/big. And it helps him ply his trade. What makes Jordi's John Thomas look very big is actually his frame. Jordi El Niño Polla's lean and small frame accentuates the size. Having seen a lot of dicks around, both in movies and in real life (I work in the medical field), I can say that Jordi is a solid 7.5 to 8 inches. ----->This WILL TRANSFORM your sex life in 3 months<= I am a fan of Jordi El Nino Polla. If you ask me, he is the Prince of Fking!! This guy is always ready. He has got a nice cock, a cute ass, and loaded balls. Compared to all other porn stars, I think Jordi is right up there. Coming to his size, he is around 6 feet, same as my height, but this fella has got a leaner frame. This makes his dick look very more prominent. As some other poster said, it is all about tricks. I will agree to it, and I will also add it "perception." I have got a full bodybuilding frame. My girth is around 6". However, I cannot see it because I have bigger and broader hands, and I see the cock from a different angle. In films, most of the cocks are filmed from the sides, a little behind the ass. Body fat also has a role to play in determining the length. My fat pad buries my Johnson. Jordi, OTOH, has got maybe 10-15% body fat and almost no fat pad, which makes it look big. I hope this little piece of information was helpful. ----- Man wears this Penis Extender in 1 min -> Watch this video :<=
